

PRESENTS:

Practical Chiropractic A Live, Hands-on Event

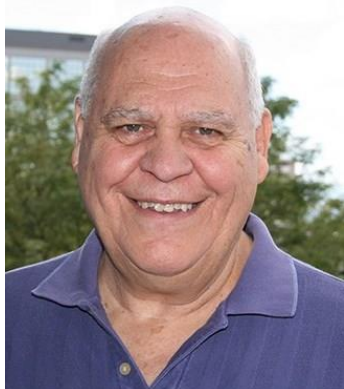

Saturday & Sunday October 7 & 8, 2023
12 CEs Colorado

Multiple Chiropractors come together to advance your knowledge of technique! Come join us for a spectacular, interactive, hands-on weekend of techniques that will amaze you and increase your ability to take patients' wellness to the next level! TMJ, SOT, GPA, cranial, postural alignment, extremities, upper cervical... you name it! The combination of this team's ability and expertise will impress and resonate with chiropractors. You don't want to miss this one! Lots of tips and tricks to take back to the office and improve patient care.

Roger Smith, DC and Brian Voytecek, DC honor the memory and outstanding work of the late Nelson Vetanze, DC by carrying on his legacy and passion to correct imbalances with GPA (Gravitational Postural Analysis) – a method of whole body alignment from head to toe. Drs. Smith and Voytecek relay the technique and passion to heal. They treat many football players, including the Denver Broncos, who need to get back on their feet fast! Get adjusted with GPA at the seminar!

William Stempel, DC, one of the keynote speakers from last Symposium, is an integral piece of the Practical Chiropractic team. Dr. Stempel brings his expertise in many varied areas and watching his remarkable work will spark an interest in his techniques. He specializes in neurological disorganization and also masters feet adjusting. He is sometimes referred to as “the bunion doctor”, with a unique ability to make them disappear. This is a chance to gleam tried and true pearls and add to your adjusting repertoire!

Carolyn Gochee, DC is a certified SOT instructor. SOT (The Sacro Occipital Technique) is a chiropractic maneuver that works to provide balance between the top and bottom of the spine and a technique that is important for the normal, everyday functions that the brain and spinal cord undertake. Dr. Gochee delves into and elucidates the subluxation complex and the relation to visceral dysfunction and pathological reflexes. She is certified in SOT Cranial, Pediatrics and Pregnancy and is also trained in Neuro-Emotional Technique and Applied Kinesiology.
